

I am writing to urge you to reject NAB's petition 04-160. I have found XM radio to be a joy to listen to on my daily commute. They provide a wide variety of music and shows that I cannot get on over-the-air radio such as 40's music, 50's music, Jazz, Classical and old time radio shows. The broadcasters only provide what is the most popular which really limits what I can listen to. I have also found XM radio's Traffic to be very valuable. Instead of having to search the dial and hope to find a traffic report I know that I can always tune into XM and get the latest traffic report. I hope you do not let the NAB bully you into taking something away that benefits the consumer. Thank you for your consideration.
